DETAILED ACTION

Claim Objections

1. Claims 28 and 29 are objected to because of the following informalities: Please verify the dependency of claims 28 and 29. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 16-20, 22-26, 31-34, and 36-38 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Sbisa et al. (Sbisa; US 6,760,426 B2; previously cited but applied for the first time).

Regarding claims 16-20 and 22-26, the claimed context inference server reads on the Context Server 104 of Sbisa. The claimed context clues for a call recited in claims 16-20 and 22-24 read on the context information and are recited at column 1, lines 55 – 67. Sbisa teaches that the operator server dynamically selects an optimal operator center (read as the context) from a plurality of available operator centers for the call based on context information (this is read as the claimed identifying a context for said call from said plurality of context clues).

Claims 31-34 and 36-38 parallel the claims above and are taught by Sbisá in the same manner.

Allowable Subject Matter

4. Claims 1-15 and 43-79 are allowed.
5. Claims 21, 27-30, 35, and 39-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 16-20, 22-26, 31-34, and 36-38 have been considered but are moot in view of the new ground(s) of rejection.
